About Me

I am a challenge-loving, creative problem solver who wants to leave the world a better place than how I found it. As a software engineer, I thrive in environments where my input is valued and I can be part of building something bigger than myself.

Experience

Podium Education
Instructional Assistant, Web Development | May 2021-Aug 2021
- Support university students in beginner coding classes (HTML, CSS, Javascript)
- Educate non-technical students on programming languages and techniques, including troubleshooting, and clearly communicated/read others' code

General Assembly
Software Engineering Fellow | Aug 2020-Feb 2021
- Completed full-stack intensive training program
- Built apps using front- and back-end platforms including HTML, CSS, Javascript (vanilla JS, React), Canvas, Node, Express, RESTful APIs, and Python

FCM Travel/FCM Consulting
Strategic Analyst | Mar 2017-present
- Analyze business travel data and make recommendations for vendor agreements for clients
- Member of team that built proprietary airline contract analysis app
- Build VBA macros for team members to streamline processes

Engineering Projects

Blerg! *(in progress)*
Blog | React, Sass/SCSS
A blogging site for people prone to starting blogs and then abandoning them after a few entries.

Palette Town
Webtool | React, Node, Flask, PostgreSQL
Users can select colors and save them to palettes for their own projects

COV-ID
Website | MongoDB/Mongoose, Express, React, Node (MERN)
A dashboard where users can search and save locations to view and monitor Covid-19 statistics pulled live from an API.

Decloset
Website | PostgreSQL, Sequelize, Express, Node
Users create their virtual closet and are able to search for nearby homeless shelters to donate items they no longer want.

Cora Destroys Everything!
Point & Click Game | HTML5 Canvas, Vanilla JS
Users play as a rambunctious kitten named Cora and have to discover the correct order to break everything in the room by learning from their previous attempts.

Skills

HTML/CSS

Sass/SCSS

Javascript

React

Node.js

Express

Sequelize

HTML5 Canvas
